EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Love on June 28, 2007.

The application has been amended as follows:

In specification, page 4, [0021], after "9A1-9D1", insert -- and 9A2-9D2--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant's statement (February 27, 2007, page 12, second paragraph), the subject application and the reference Willis (US 2004/0004708) were, commonly owned at the time the invention was made, is deemed persuasive. Therefore, rejections relying upon Willis (US 2004/0004708) are withdrawn.

The most relevant reference in the list of prior art cited is Harvey et al. (US 2004/0045934) who teaches that at least one endpoint signal may be measured. At least one filtered endpoint signal may be generated by applying a Savitsky Golay filter to the at least one endpoint signal. However, Harvey does not teach that the first filtered

signal corresponds to a first chemical constituent whose concentration decays during endpoint and the second filtered signal corresponds to a second chemical constituent whose concentration rises during endpoint. The end point is determined from the ratio signal generated by a ratio of said two filters endpoint signals. See also applicant's amendments and responses on February 27, 2007 (particularly, page 11, last paragraph; and page 12, last two paragraph), which are deemed persuasive to overcome the previous 35 U.S.C. §103 (a) rejections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kin-Chan Chen whose telephone number is (571) 272-1461. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you
